

Reviewers Think Think-ets Are A Hit!

"Kids can play storytelling games, test their memory, or fiddle with the little pieces. Just the thing to take when we embark on a 19-hour plane ride next week."

"Next time you find yourself in a mid-level panic over what to do with the kids, turn off the Game Boy and look to Think-ets. The little mesh pouch holds a host of fantastical trinkets to spark the imagination."

"School aged kids on up to adults, will find Think-ets an incredibly amusing diversion that turns waiting time into fun time and turns you, into that cool mom you always knew you'd be. Kudos!"

"Think-ets are a wonderful and inexpensive addition to your "bag of tricks." Actually...they *are* the bag of tricks. Think-ets is a mesh bag (*with only a piece of recyclable cardboard as excess packaging - woo hoo!*) filled with trinkets designed to encourage imaginative play and critical thinking."

"Think-ets are the kind of conversation starter that might come in handy on your next flight with your grandchildren... or while waiting for an elusive waiter."

"This infinitely entertaining little game literally fits up your sleeve or in a pocket of any purse. It's open ended and perfect for travel, waiting rooms, or restaurants."
